ABSTRACT

The guide is designed to help administrators of intercollegiate athletic programs review policies, procedures, and practices to determine if they are in compliance with Title IX's attendant regulations. The document addresses those areas of intercollegiate athletic program offerings that the Department of Health, Education, and Welfare has stipulated in the Title IX Regulations. The document is divided into three basic areas: Area I is designed to obtain institutional demographic information that proves helpful in the determination of funding consideration. Area II investigates policies, practices, and procedures governing thirteen aspects of intercollegiate athletic program offerings and services. Following each subsection in this area, administrators have the opportunity to provide a statement to support their determinations of compliance or noncompliance. The document also offers the opportunity to present institutional plans to address noncompliance. Area III is designed to determine the projected impact of Title IX on men's and women's programs.
